Easilys 0.600.0

2024-11-25 17:37:38

General

- Changes:
  - #17110 : It is now possible to freeze and hide columns in the d-table component of the d-system. This also prevents the column from being configured on the screen.
- Bug fixes :
  - #17139 : Fixed test of e-select-multiple component..

Sales

POS Records

- Changes:
  - #16746 : ✔ The "POS Records" screen is replaced by the new "POS Datas" screen..

POS Datas

- Changes:
  - #16746 : ✔ The new "POS datas" screen replaces the "POS records" screen. The new screen lets you consult the sales history per day and per site from your POS (overall sales, number of tickets, number of seats). It also allows you to define and manage the correspondence between POS-registered products and Easilys-registered recipes. This mapping enables you to automatically consolidate certain indicators, such as the number of sales per recipe, revenue, and to automatically destock the products that compose the recipes sold and known losses/markdowns.Translated with www.DeepL.com/Translator (free version).
  - #17048 : 🖊 Modification of the cash register data import job to process JSON files and import them one by one..

Menus

Menus

- Bug fixes :
  - #17094 : Correction of erroneous recipe price display due to the sample dish

Menus templates

- Changes:
  - #17130 : ✔ Increase comment field capacity from 250 to 500 characters

Smart particularity

- Bug fixes :
  - #17056 : Improved display of the menu frame list when creating a menu plan.

Menu pre-design

- Changes :
  - #17096: ✔ Proposal to add TSD-compliant recipes to the menu plan.
  - #15015 : ✔ It is now possible to filter recipes in my menu plan by favorites or not.
  - #17156 : ✔ Display a star for favorite recipes, with the option of making a recipe favorite or not. :

Production

Production postponement rules

- Changes:
    - #17059 : Added a switch in the production delay rules page to select the rule definition mode: "from menus" or "from site orders". Added a productionType column to the ProductionTimeLagRule table.
    - #17110 : The action column with the "…" in the list of production delay rules is now frozen on the right and cannot be configured from the "Configure" option on the screen.

Stock

Known losses and markdowns

- Changes :
    - #17018 : ✔ User interface adjustments. Default screen is now the list of losses.
- Bug fixes
    - #17018: Correction of the list of reasons proposed in the filter
    - #17018: Correction of double recording of losses for a recipe via a template.
    - #15827: Users on children's sites can now see templates on parents' sites. :

Management

Management

- Changes :
    - #17120 : 🔧 Adaptation of the consolidated sales data source..

Tools

Administration of reports

- Bug fixes :
    - #16764 : Corrected loading of XML templates by allowing loading of all XML files beginning with '<'.
