Easilys 0.640.0

2025-04-15 11:07:06

General

- Features:
  - #17523: ✔ The Label text field of diet is now a multi-language text field (data translatable by the user into the language defined in their profile).

Equipement items

Equipement items

- Bug fixes:
  - #17428: Fixed "Update" button greyed out after error but still clickable in photo upload modal.
  - #17428: Fixed photo file selection on Android, now asking to choose from gallery or camera instead of forcing camera.

Products

Price lists

- Bug fixes:
  - #17650 : ✔ Prohibit manual refresh of finished product prices if the price calculation job is configured.

Price schedule

- Bug fixes:
  - #17639: Fixed a bug in the client supplier product prices job that would fail if a supplier product is in two price lists of the same supplier, with one pricelist's dates fully including the other.

Recipes

Recipes management

- Features:
  - #17318: ✔ Added the ability to reactivate a recipe.
  - #17679: ✔ Optimize performance by limiting computing of the recipe flat routine to recipes modified by product or ingredient substitution.
- Rights changes:
  - The right « Activate a recipe » has been added.

Sales

Dashboards

- Features:
  - #17714: ✔ Added "Sales - Detailed view" dashboard.

Menus

Menus

- Bug fixes:
  - #17671: Depending on the choices made by the user when editing the Weekly Menu report, the absence of allergen or label information on the first recipe of Monday could suppress allergen or label information on the first recipes of other days. This malfunction has now been corrected.

Menu templates

- Bug fixes:
  - #17558: ✔ Disabled the creation of Textures, Segments, Diets, and Guests from a child site

Smart specifications

- Bug fixes:
  - #17535: Manage the list of sites as a tree structure in the search. Add an option (tick) to display or not the children of the sites corresponding to the search..

Menu pre-design

- Features:
  - #17368: ✔ In the list used to add a recipe to a menu plan, the 'coverage rate' is now indicated for each recipe, i.e. the percentage of frames for which this recipe may be suitable, taking into account the constraints of the menu plan and the rules of smart specifications.

- o #17681: ✔ You can now pin/unpin a recipe per day and dish. There is currently no effect on the menu impact engine, but later it will be possible to replace the potential 'pencil' tile with this recipe pinned during menu impact.

Production

Production plan v2
- Features:
  - o #17537: ✔ Added drag and drop functionnality for items inside the same workshop to improve greatly UX. Changes are local only and are not saved for now
- Bug fixes:
  - o #17609: Production plan v2 was not in beta.

Stock

Stock v2
- Bug fixes:
  - o #17042: Fix an issue in the stock entry panel where an error is shown for the unit price if its initial value is >= 1000.

Management

Dashboards
- Features:
  - o #17714: ✔ Moved dashboards back to "Management".
