

# Easily 0.665.0

2025-06-24 16:00:41

## General

- Features:
  - #16833 :  Modification of configuration keys for kitten-mq connection.
  - #17862 :  d-system bumped to version 2.13.1 (from 2.12.0).

## Products

### Price lists

- Bug fixes:
  - #17845 :  The user can now edit the prices of suppliers' products when automatic price calculation is disabled.

## Menus

### Menu quantities v2

- Features:
  - #17848:  Added the ability to duplicate the forecast quantities of any period onto any future period.

### Menu pre-design

- Features:
  - #17901:  Modification to the display of date and meal lines: they now remain visible when the screen is scrolled down to make the menu plan easier to understand.
  - #17902:  Improved performance for displaying the list of contextual problems.
- Bug fixes:
  - #16470: Fixed an issue where it was impossible to select a past date when duplicating a menu plan. It is now possible to select a date in the past during duplication.

## Supplier orders

### Order preparation

- Features:
  - #17847:  In the order preparation screen, the label icons (AB, Label Rouge, etc.) are now displayed on the products they apply to.

## Production

### Production postponement rules

- Features:
  - #17890 : To avoid errors and conflicts, it is no longer possible to define several postponement rules for the same production workshop and the same delivery day on one site.
