

Easily 0.675

2025-08-12 10:40:55

General

- Features:
 - #17993:  Added MAPALOS_ADMIN_USER_ID configuration parameter to specify a Mapal OS user ID that should login as the super admin user in Easily.

Products

Price lists

- Features:
 - #17843:  Improved performance when adding a product to a pricelist where there is a lot of supplier products in the database (4s to 300ms).

Suppliers

- Bug fixes:
 - #17889: Fixed a bug with the payment method assigned to the creation of a purchase order. It occurred when the site placing the order had not specified a specific payment method in the supplier's file (inherited data not overridden) while having activated the list of payment methods. By default, the activated payment methods and the supplier's value are now set to "None."

Recipes

Recipes management

- Features:
 - #18014:  The label text field of Texture is now a multi-language text field (data translatable by the user into the language defined in their profile).
 - #18014:  The label text field of Segment is now a multi-language text field (data translatable by the user into the language defined in their profile).
 - #18014:  The label text field of Diet is now a multi-language text field (data translatable by the user into the language defined in their profile).

Nutrition

Nutrition families

- Features:
 - #18014:  The label text field of Guest is now a multi-language text field (data translatable by the user into the language defined in their profile).

Menus

Menus

- Features:
 - #18014:  The label text field of Texture is now a multi-language text field (data translatable by the user into the language defined in their profile).
 - #18014:  The label text field of Segment is now a multi-language text field (data translatable by the user into the language defined in their profile).
 - #18014:  The label text field of Diet is now a multi-language text field (data translatable by the user into the language defined in their profile).
 - #18014:  The label text field of Guest is now a multi-language text field (data translatable by the user into the language defined in their profile).

Menu templates

- Features:
 - #18014:  The label text field of Texture is now a multi-language text field (data translatable by the user into the language defined in their profile).
 - #18014:  The label text field of Segment is now a multi-language text field (data translatable by the user into the language defined in their profile).
