 - #18284: 🚫 WIP: Screen visibility toggle for profile pages. Added first step, to create the ability to control screen visibility per profile with database schema updates and UI implementation.
 - #18285: 🚫 WIP: display, on actions that affect multiple pages, an icon indicating that they are 'shared'.
 - #18289: 🚫 WIP: added an ability to copy rights from a profile to another.
 - #18286: 🚫 WIP: added an ability to search by a right by label.

Equipment items

Interventions

- Features:
 - #16471: ✓ Added a new field total cost including tax in the quotation form for an Intervention form.

Recipes

Recipes management

- Features:
 - #16867: ✓ Optional fields for recipe labels are now available in the recipe report route.

Sales

POS data

- Features:
 - #18018: ✓ Added a warning when a POS product is mapped to a disabled recipe.
 - #18018: ✓ Added a filter for POS products mapped to disabled recipes.
 - #17819: ✓ Added losses and known shrinkages flow import (JOB_LOSSES_AND_KNOWN_SHRINKAGES_IMPORT) to the list of jobs to configure for the screen.

Nutrition

Constraints on nutrition families

- Bug fixes:
 - #18317: ✓ A Load more button in the dropdown list of nutritional family while creation constraint on nutritional families

Supplier orders

Supplier orders

- Bug fixes:
 - #17615: ✓ Correction of the time indicated in the PDF of the supplier order form.

Receptions

- Features:
 - #18096: ✓ A new 'Documents' tab has been added to the delivery note details. Here you can add a document, view it or detach it from the delivery note.

Supplier Invoices

- Features:
 - #18078: ✓ Create a new invoice endpoint from API for integration import.

Stock

Stock v2

- Features:

- #18084: ✓ Addition of a detailed view for each stock movement, regardless of its type. This view is accessible via the ... at the end of the line.
- Bug fixes:
 - #18117: Improved initial loading of stock movements.

Inventories v2

- Bug fixes:
 - #18223: (V 0.695.1) Ensures that the full entered quantity in a new count is correctly recorded regardless of locale.

Stock transfer

- Bug fixes:
 - #18296: (V 0.695.1) Negative stock is now taken into account to compute the current stock of products.

Known losses and markdowns.

- Features:
 - #18085: ✓ Added a search field by product/recipe name.
 - #17819: ✓ The flow from the " mapal-bus" dedicated to losses is now taken into account. This allows losses reported in the cash register system to feed into easilys' known losses and markdowns screen.
- Bug fixes:
 - #18085: The total material cost at the top right of the screen now takes into account the filters and search.

Management

Service counts

- Bug fixes:
 - #18324: (V 0.695.2) Fixed meal type creation.

Waste analysis

Dashboards
