

Easyls 13 nov 2024 Release – 0.595.0

Evolutions Icons Caption

-  Technical modification
-  Available immediately / FINAL

Available immediately but functionality not yet complete, can be opened to users / BETA
Still under development, not to be mentioned or activated by users / ALPHA

General

- Changes :
 - [#17109](#) :  Created an API to list over a period of 3 months for each site:
 - the number of connections
 - the number of orders and the number by order type
 - the number of invoices
 - the number of receptions
- Rights (access) evolutions :
 - The right "View the list of billing activities of all sites" has been added.

Calls for tenders

Calls for tenders

- Changes :
 - [#16985](#) :  Added an explicit error when an Oasys supplier tries to access RFPs from an Easyls where no supplier is linked to the Oasys supplier

Products

Product Families Management

- Changes :
 - [#17011](#) :  The product family with id 1, often referred to as "Aucune", being the default family, is no longer hidden in product family management. This allows it to be associated with an analytical group, for example.

Sales

POS Record

- Changes :
 - [#17108](#) :  Added automatic checks when importing POS records.
 - [#17108](#) :  Fixed column names in table for better consistency with business needs.
 - [#17108](#) :  Updated the calculation of the unit selling price excluding VAT when importing POS records.
 - [#17137](#) :  Added the job for importing tickets from POS (JOB_POS_RECEIPTS_IMPORT) to the list of jobs to be configured for the proper functioning of the screen.

Menus

Smart particularity

- Changes :
 - [#17115](#) :  Remove Beta mode

Menus pre-design

- Changes :
 - [#17115](#) :  Remove Beta mode
- Bug fixes :
 - [#17046](#) :  Fix to allow creating a menu plan from today's date
